TWENTY YEAR HISTORY

Home Demonstration Work, Cochise County

The history of Home Demonstration Work in Cochise County has been a most interesting study of records. We found in our office files, complete records from 1924 to 1934 inclusive. No record has been found for 1923. Whether there was no Agent during this year or no report filed we do not know. Records for 1918, 1919, 1920, 1921 and 1922 were found in the Central Office. It is surprising how near the geography of 1918 to 1921 and 1934 coincide. I am sure it would be gratifying to the women who organized the centers in Cochise County to know that in 1934 we are contacting the same centers that she used in her pioneer work with the exception of Pirtleville and Light. Douglas and Bisbee being towns of over 2500 have now dropped from the work. Otherwise the map remains practically the same. Organization has changed from the Home Bureau of 1918 and 1919 to Home Demonstration groups in 1934. Less co-operating with the Chambers of Commerce, Y. W. C. A., Y. M. C. A., County Doctors and Federated Clubs and greater co-operation with Specialists from the University. It is interesting to know the personnel of the early group. The 1918, 1919 and 1920 reports show much work with the Mexican girls and mothers in Douglas and Bisbee. Co-operation with the County Agent in 1919 and 1920 is reported in detail under demonstrations given with the pressure cooker, canning and meat cutting.

Home Demonstration Agents - During the twenty years we have records showing that Miss Louise Spoerleder, Miss Grace Ryan, Miss Laura Mae Seward and the present Agent have served the County with the exception of 1923, the year for which we have no records. Mrs. Mary Pritner Lockwood and Miss Hazel Zimmerman assisted from the State Office previous to Miss Stella Kather, Miss Frances L. Brown and other Specialists.

Nutrition - Each Home Demonstration Agent has carried a full time Nutrition Project. The years 1918 to 1923 show that much of the Nutrition work was presented through school lunches. It is amazing to see how the Mothers co-operated in this. School Boards furnished food and the mothers did the work. The hot lunch follows through the years from 1925 to 1928 being sponsored by the Keep Growing Work. The Keep Growing Project had the largest enrollment and numbers show the "greatest influence" of any of the Nutrition work.

Food Preparation - Food Preparation demonstrations have been given every year, perhaps reaching the peak during the

time when "Foods for Hot Weather" seem to have been put on County Wide.

Canning - Canning has been carried as part of the Nutrition Project since 1918. In making comparisons, fruits, vegetables (dried, canned and brined) amounted to 17,200 quarts while the same years report for meat and poultry shows only 120 quarts. These figures could easily be reversed in 1934, probably due to the increased number of pressure cookers and better methods of taking care of meats.

In 1934 we find definite work in Meal Planning, in both the adult and 4-H Club Work. 1930 canning was carried as the major project in Adult work. The first picture of a 4-H Canning Club in this County in 1918 has a little girl, from St. David actively engaged in filling a fruit jar. It is interesting to note that in 1934 she won the Kerr Contest for adult canning in the State.

Health and Sanitation - Early reports show that most of the health problems must have been solved by the Home Demonstration Agent. She saw to it that Pirtleville had a garbage farm, she inspected the dairies around Douglas and made reports to the State Officials. She organized the Mexican groups for instruction on the care of the sick and gave thirty demonstrations on food for the sick. She saw to it that ten homes were screened and co-operating with the County Agent offered a prize of \$8.00 to one who would catch the most flies. The award went to a lad who had three pounds of flies to offer. Someone else must have taken over Health Work for a few years, since in 1929 our 4-H Health Clubs were organized and have been carried through to the present time. In 1932 a course in Home Nursing, co-operating with the Cochise County Health Unit, has an outstanding piece of work to report.

Home Furnishings - All of the 1918 to 1925 reports talk about the pioneer woman in the adobe shanty with a possible lean-to. However most of the reports during the past fifteen years could be included in our 1934 reports and no one would suspect the shift. In the early days a Testing Kit which included a pressure cooker, fireless cooker and other smaller pieces of equipment seem to have been loaned about a community and reports made on the efficiency of such equipment. Conveniences about the home have had suggestions in most reports since 1918. In 1925 seven communities carried on a Kitchen Improvement campaign which was repeated in 1927 in three communities.

Clothing - In 1918 we have our first Clothing records. For five years this project seemed to be divided under three heads, Millinery, Garment Making and Dress Forms. Millinery work seemed to be the wedge to start Home Demonstration Work in practically every community. One community reports 115 new hats and 25 remodelled in 1919 with a money consideration of \$602.00. Dress Form demonstrations seem to precede most Garment Making Schools. Garment Making consisted of made over flour sacks and new problems. In 1925 Clothing was given in seven communities with 38 women reporting and a value of \$144.00.

Club Work - Junior clubs were first organized with the Mexican girls at Tin Town and Pirtleville, following Bread and Baking Clubs, Meal Planning, Poultry and Canning which increased in numbers each year. 4-H Club Work seems to have taken over the junior work in 1925 and since then each year will find additions but very few changes in subject matter.

In summarizing the impressions gained by a review of Home Demonstration Agent's Work in this County we will say that with the exception of transportation the problems are very much the same throughout the years. Clothing and Home Furnishings the popular projects and Nutrition, Health and Sanitation, which should be the most important, are still side stepped. The greatest change seems to be in the number of attendance. Less miscellaneous work is being done and more project work as the years advance. In the early history local leaders seem to carry the burden but as a whole we find that women are interested in the same type of work that they were in 1918. The approach may be a little different. Reports vary but the fact that Home Demonstration Work has been carried on in the same communities from 1918 to 1934 inclusive shows that these women are either long suffering or much interested in Home Demonstration Work.

1.

STATUS OF COUNTY ORGANIZATION

Home Demonstration Work in Cochise County has been carried on through the local Farm Bureaus as Stewart and Double Adobe, County Farm Bureau, Relief Societies at St. David, Whitewater and Pomerene, Mother's Club at Webb, McNeal Woman's Club and the County Fair Board. All other groups have been organized by the Home Demonstration Agent. These are the Stewart Community Club, Sulphur Springs Community Club, Double Adobe Woman's Club, Forest Station group, the South Bisbee group, Frontier Women's Club and the Valley Woman's Club at Whitewater. The Cochise County Health Unit has cooperated in Health problems both in Junior and Adult groups, but no organized work has been attempted this year. As soon as groups are ready it has been recommended that they organize with officers and constitution. This leaves the Agent free to present subject matter and not spend so much time in looking after details.

Bertha Virmond
Cochise County, Arizona.

PROGRAM OF WORK

I. - Factors to be considered in developing the 1934

Program of Work:

1. Size of County - Distance between communities and scattered homes.
2. Limited Expense account.
3. History of project.
4. Needs for work - There? - What? - Equipment to work with?
5. Present progress of development.
6. Spirit of co-operation and help given to Agent.
7. Present Economic Situation.
8. Requests for work, which could not be met on account of time, and mileage.
9. Increased home gardens and the need of caring for this surplus.
10. Committee's requests.
11. Suggestions from State Agent.

NUTRITION

History - See 1930, 1931, 1932 and 1933 Reports.

Food Preparation - Food preparation has been given a part on the extension program for the past four years. This has included low cost meals, cottage cheese (preparation and uses), American Cheese, sandwiches and lunch box suggestions, ice-cream and butter making.

No regular work had been planned for this year in Food Preparation but interest was such that 17 method demonstrations were held in 7 communities on the following subjects:

Tamales - Time was spent in getting together recipes for several Mexican dishes. The tamales were steamed in the pressure cooker in much less time than is usually given this dish.

The use of the pressure cooker for steamed puddings, brown bread, fruit cakes was used in connection with the Christmas meetings. These were sealed and processed and have proven very helpful.

A Deboning Demonstration was given by Clyde F. Rowe, Dairy and Poultry Specialist, to two communities. Afterward the chicken was stuffed and cooked. This followed a killing and picking demonstration and was much appreciated as these communities sell

dressed poultry.

While eggs were cheap a noodle demonstration was given in two communities and the noodles dried for winter.

Cheese Making - Mr. Clyde F. Rowe gave the Agent a demonstration on the making of American cheese. Following this, the Agent held three demonstrations.

The new method of making cottage cheese and other soft cheese was attempted with good results.

8.

Food Preservation:

For the past five years Food Preservation has been the major project in Cochise County. At that time there were no sealers or tin cans used in the County and very few pressure cookers. Canning was largely a matter of fruit, tomatoes, jelly, jams and a few pickles. The whole County was prejudiced against tin cans; all meat was made into jerky, or the surplus given away. Group work was used as the approach. Where possible each group was encouraged to buy a pressure cooker. Soon each community owned two and sometimes three large pressure cookers. As soon as the individual saw how much food could be canned in one day with a pressure cooker it wasn't hard to get the family interested in owning a pressure cooker. The attached list will give some idea of how these pressure cookers have been placed. Commercial firms have been very helpful by giving a special price on group orders of six or more pressure cookers.

After the family is equipped with a pressure cooker then the only worry is having something to can. Since fruit has been very scarce canning of vegetables and meats has been the demonstrations that have been given in every community where the work was requested. The

Bertha Virmond
Cochise County, Arizona.

method of giving these demonstrations was discussed last year and there has been little change this year. The largest canning was held at Pomerene where 410 No. 3 cans of beef were canned in one day with the help of ten women, four stoves and six pressure cookers. As a result of this canning eight pressure cookers were purchased in this community within the month.

Mexican food is a favorite food in this county and some time was spent in working out recipes for tamales and the canning of tamales and chili con carne.

Wild game has been a great help in having a variety of meat the year around but a recent official opinion says we can have game in our possession only ten days after season. This means the quail, duck, fish, deer, wild turkey, etc. will no longer be canned.

Canning exhibits were sent to the Local Fairs at St. David and Wilcox and to the County Fair in Douglas. Mrs. Gladys Busby won first place in the County for the best individual exhibit and will compete in the State Contest.

The Kerr Glass Mfg. Corp. gave twelve dozen Kerr glass jars to be used to encourage Home Canning in

this County. These were used in six communities for the best record of winter canning. This of course was largely meats, with sweetpotatoes. Then a County prize was given for the best canning story.

The Ball Brothers offered free recipe books for canning reports exclusive of tomatoes. The report received is attached.

It has always been hard to get records of home canning and the following records do not give a fair estimate of the quantity of canning that has been done in this County.

The Agent has spent 21 days in giving canning demonstrations in twelve communities. This included 33 method demonstrations with an enrollment of 335 and 275 completions. 46 project meetings were held with an attendance of 603.

In the 1934 Kerr Contest Mrs. Gladys Eusby of St. David won the state honors.

CLOTHING

A - Adult

History - See 1930, 1931, 1932, 1933 Reports.

During the past five years clothing has been neglected entirely or only miscellaneous demonstrations given as requested. During the summer of 1934 outlined work was given to the following communities: South Bisbee, Forest Station, Sulphur Springs, Stewart, Whitewater, Whitewater Relief Society, Webb, Double Adobe and Frontier. With 72 demonstrations, 330 women enrolled, 280 women completed and a total attendance of 1374. Our women who completed their models and attended 75% of these demonstrations were considered "completed". All others are reported under attendance.

Subjects covered at regular demonstrations were as follows:

I & II - Repair: Machine patching
Machine darning
Stockinet patch
Set-in patch
Set-on patch
Drop stitch

III & IV - Renovating: Dry cleaning
Spot removal
Pressing
Cleaning and blocking hats

- V - Seams: Machine and Hand Finishes.
- VI - Collar and Cuffs, Sleeves, Cutting and Finishing,
Buttonholes and other fastening.
- VII - Underwear, bias and fitted. Bias tape.
- VIII - Fancy stitches.
- IX - Color and Design.
- X - Materials, testing.
- XI - Demonstration materials.
- XII - Clothing selection.

This work was carried on in all-day meetings and each member made a model of each problem presented and kept a notebook. Mimeographed material with instructions was distributed at each meeting. This material and the models completed a nice collection of sewing helps which were bound or placed in filing cabinets. The work was planned as a beginning for a Clothing Project and not intended to be complete in any way. The original plan was for each group to have six demonstrations. Later it was found that in most communities twelve demonstrations were needed to complete all the material outlined.

Demonstration material was borrowed from the Spool Cotton Company and the Department of Home Economics, Washington, D. C.

Miss Frances L. Brown gave one demonstration on the Overall Patch, Bound Buttonhole and Set-in Patch.

Remodelling Clinics completed the Clothing work at Forest Station and Frontier. These were two day schools conducted by Miss Lella Blake, Clothing Specialist from the Agricultural Extension Service, University of Arizona.

Twice each year demonstrations have been given on the renovating and blocking of hats. This has been very interesting and helpful work as well as a marked saving.

HOME IMPROVEMENT and HOUSE FURNISHINGS

History - See 1930, 1931, 1932 and 1933 Reports.

Under the heading of Home Improvement the Agent has included all subject matter not included in Food Preservation and Food Preparation and Clothing. Subjects discussed were requests from groups, and where the Agent felt that the subject matter was of importance to the whole community. For example, soap making. This probably should be considered the by-product of the Food Preservation Project but was asked for by the Home Improvement groups and demonstrations were given with good attendance and follow-up reports.

The Home Improvement Project has been carried over the six years the Agent has been in Cochise County. This has always been divided into exterior and interior demonstrations. The State Agent and County Agent have given assistance. This year Miss Zella Blake gave a series of Home Furnishings Demonstrations, which added new interest to the project. These demonstrations were given in a series of six lessons, two each day in three communities. The ladies were very appreciative of Miss Blake's work and expect to continue with the building and remodelling of furniture during the coming year.

Report of Home Furnishings Project carried on by
Miss Della Blake:

Stewart	Webb	Double Adobe
Jan. 75	32	51
Feb. 77	57	54
Mar. <u>65</u>	<u>50</u>	<u>70</u>
217	139	175

Bedding has always interested these groups. They have all renovated pillows, mattresses and comforts. They have learned to card wool and cotton which has saved many dollars. Mrs. Leake carded enough cotton for a mattress and from seeing her work many mattresses were partially re-carded and re-covered. "A comfort protector on every blanket and comfort" has been a county-wide slogan. These were plain or fancy as time permitted.

Many quilts have been made. The Frontier ladies have made two and sold them to furnish their club room. The Mother's Club at Webb, Whitewater, Stewart and Sulphur Springs women have all made and sold quilts to pay for community pressure cookers. In each case when the community quilts were finished, children's quilts have been made for the

Children's Home in Tucson. Quilt Shows have been held in St. David, Douglas, Willcox and at the County Fair. These have helped to create an interest in bedding.

Rugs continue to interest many women. The hooked rugs are most popular. The designs and colors are planned at our regular project meetings and the rugs finished at home.

Weaving with native grasses and reeds has taken on a competitive issue between the Sulphur Springs and Stewart Communities. Mrs. Frank Flanders has completed 19 weaving problems and won first place on amount and quality of work.

Picture Framing in South Bisbee and Stewart was the basis of the study of pictures in the home. These frames were made of cacti, beaverboard and wood.

An "Exchange" has been conducted during the year. This has been helpful to many families.

Each year a Christmas meeting has been held in connection with the Home Improvement work. Hand made articles for the home have been collected by the Agent. Each woman brings her collection. Patterns and ideas have been exchanged. This has been very helpful in out-lying communities where the women seldom get to town.

During the past year Home Management and House Furnishings demonstrations have been given in 10 communities with an enrollment of 511 and 353 completions and an attendance of 995.

4-H Leadership Club

See pages

MISCELLANEOUS

Better Homes:

The Agent acted as County Chairman for the Better Homes movement. Little interest was taken in the movement during the past year. The Douglas Woman's Club had their annual quilt show and the Home Demonstration Clubs observed the Day by answering roll-call with a "Fix-it" report. These varied from painting the walls with buttermilk and ashes to fixing the tea-pot with glue made from mesquite beans.

Fairs:

Willcox Harvest Festival - The second Annual Harvest Festival, sponsored by the Willcox Woman's Club, the Stewart Community Club and the Sulpher Springs Community Club was a credit to all the organizations cooperating. The Flower Show was judged by Mr. Draper from the Agricultural Extension Service. The Stewart women had charge of the canning, vegetable and grain displays. The show was seen by more than 500 visitors.

Plans were made for the St. David Local Fair. Every detail had been completed to make this a worth-

while exhibit when Infantile Paralysis made it necessary to close all public gatherings.

County Fair - The Cochise County Fair was held in the Farmers' Market in Douglas. While the space for exhibits was small, everything was so clean and well displayed that the women felt their part of the Fair was unusually fine. With one exception the chairmen held over from the previous year which helped to make the organization easier to work with.

State Fair - For the first time in many years Cochise County did not send an exhibit to the State Fair.

Canneries:

Two commercial canneries have continued to operate in the County. Assistance has been given the Harbour Cannery in the selection and care of sealers.

Farm Bureau:

The annual Farm Bureau picnic was held in Cochise Stronghold. Speakers were furnished by the University.

4-H Club Work

History - See 1930, 1931, 1932 and 1933 Reports.

4-H Club Work has been a major project during the past five years. The history of Club Work has been very much the same from year to year. Some years special stress has been put on Health Clubs. During the past year Garment Making Clubs have received the most attention. Club Work has been carried on through the rural schools wherever it has been possible. This has included Health Clubs, Garment Making and Camp Clubs. Such clubs are all finished with the close of the school year. Our groups are then reorganized for summer work. The summer work has included Canning, Garment Making and Garden Clubs.

The interest in 4-H Club Work has been most satisfactory to the Agent. If it had been possible to supervise twice as many clubs the past year there would have been material to work with.

The interest of the adult clubs in the 4-H organization has been encouraging. The South Bisbee Woman's Club, the Forest Station Group, the Velly Woman's Club, the Webb Mother's Club and the Stewart

Bertha J. Virmond
Cochise County, Arizona.

Community Club have all expressed themselves as being willing to pay the way of the outstanding club member to the state Club Week in Tucson. The County Farm Bureau has offered to pay the way of two boys. This has been the first cooperation of this kind that the Agent has had and she appreciates the attitude of the Adult Clubs toward 4-H Club Work.

During the past year we have organized and completed nine 4-H Garment Making Clubs, one Leadership Club, three Health Clubs, two Camp Clubs and two Canning Clubs. Each of these groups have had at least one achievement during the year at which time each boy or girls has taken some active part in the program. Sixteen demonstration teams have been trained and five judging teams. On each achievement an exhibit of the work completed during the year has been made for the benefit of the parents and the public. Since there is no 4-H department in our County Fair the girls entered in the open classes in canning and sewing and received more than their share of ribbons. Miss Ethel Smith represented the 4-H Clubs of this County in National broadcast early in November.

Bertha Virmond
Cochise County, Arizona.

Through the generosity of the school board of the Pearce Union High School in furnishing a bus for the occasion it was possible to take twenty-six 4-H boys and girls and three leaders to our Annual 4-H Club Week in Tucson. This group of boys and girls competed in four team demonstrations and five judging team contests. Two candidates tried out for the State Health Champion. They also furnished two contestants for the Dress Revue. In addition to this the group furnished one number on the program for the Dress Revue and one number for the annual banquet. Much credit goes to Mrs. Maria Dillman, who has been the outstanding Club Leader of this County, for the success of this trip.

The State Home Demonstration Agent and State Club Leader have given us valuable assistance in carrying out our County 4-H Club Program.

4-H Garment Making:

Nine Garment Making Clubs with an enrollment of 95 and a completion of 74 girls represents the work of the County. Most of this work was carried on as vacation project work. The number of completions was smaller than should have been due to the shifting of the rural population in order to find work. The con-

stant problem of distance is our greatest handicap in this County. Some of these girls rode horseback ten miles in order to be present at club meetings.

Miss Daphne Thurman and Miss Doris Leishman, fifth year Garment Making girls, competed in the state contest for Dress Revue, Doris placing first in her class and Daphne third and Doris third in the state. The class B demonstration team for the County in Garment Making placed first in the state contest.

The attached records show the enrollments, leaders and reports for this group.

4-H Leadership:

A small group of six older girls known as the McNeal Leadership Club completed their requirement of having attended twelve club meetings, and finishing at least one club year in a project of their own choosing and acted either as leader or assistant leader to some other group. They have had charge of all of the social activities of their community. This includes Sunday School, dances and picnics. They have earned money enough during the past year to send four of their trip winners to Annual Club Week and to take care of the expense of a four day Club Camp held in Rucker Canyon. This involved the expenses of sixteen club members and one leader.

4-H Canning:

The 4-H Canning in this County carried a smaller enrollment than any time during the past three years. This was not due to lack of interest but rather shortage of money and material in order to fulfill the club requirements. For example Daphne Thurman, who has been one of the outstanding canners in the county, canned all the surplus of the truck gardens in her immediate neighborhood. This was canned on shares and included all kinds of vegetables. Her total canning report shows over 900 containers and yet she lacked the meats and fruits necessary to fulfill her club requirements. This is offered as an explanation rather than as an apology for the type of work carried on in the County this year.

Doris Leishman, who has been enrolled in Club Work for the past eight years, was one of our County candidates for the Kerr Award and was very happy in placing first, for which she will receive her trip to Chicago during the National Club Congress.

4-H Health:

The three Health Clubs in the County during the past year were second and third year Health Clubs.

Bertha Virmond
Cochise County, Arizona.

County contests were held at which time a Health Champion was selected for State Competition.

Special stress was placed on corrections while probably most of the credit for this should go to the Cochise County Health Unit, Our Health Clubs had an active part in helping to bring these corrections about. Ten club members were fitted with glasses, six tonsilectomies, and two appendicitis operations. Special attention was given to posture. The Webb Health Club had contests during the entire club year with awards for the outstanding improvement in posture. This same club won the county placing in Health demonstrations, were sent to Club Week and placed first in their class.

4-H Camp:

The two 4-H Camp Clubs were located within ten miles of each other and carried on active competition during the entire year. In both groups the boys specialized in mending and caring for their own clothes and on achievement day had good exhibits in washing, ironing, pressing and patching. Each group had two overnight camping trips and took part in their achievement program.

CUTLOOK AND RECOMMENDATIONS

The Agent feels that extension groups have appreciated the assistance given them this last year more than in any previous year. Work will be continued along the same lines as last year, with special stress on Nutrition. Home Improvement and Clothing will be continued, giving about three months time twice a year to each project. While the outlines for the Home Maker's Groups have not been received it is hoped that we will be able to organize four of these groups.

The 4-H Clubs must continue in every community. While the Clothing, Canning and Health Clubs have been the popular clubs other projects should be added, not only in the organized communities but in many new communities. There should be a County organization and a County 4-H Achievement Day.

SUMMARY

During the past year the Agent has spent eleven months and ten days in carrying on Demonstration Work in Cochise County. During this time 102 days have been spent in the office and 191 days in the field. This time has been divided among 21 communities. Nine of these communities have had regular organized adult Home Demonstration Work with an enrollment of 352 members.

The junior work has been carried on entirely through 4-H Clubs. A total of 17 4-H Clubs have been organized and completed with a total enrollment of 152 and 126 completions. In addition to regular 4-H Club requirements five Judging teams and sixteen Demonstration Teams were trained. Representatives in Canning, Garment Making and Health took part in all State Contests.

318 method demonstrations were given to a total attendance of 5783 members. This includes adult and junior work.

15 achievement days with a total attendance of 499 were held with representatives from the University taking care of the judging.

26 boys and girls and 3 leaders attended the Annual Club Conference in Tucson.

Bertha Virmond
Cochise County, Arizona.

Food Preservation, Food Preparation, Clothing, Home Management and Furnishings were carried as projects during the year.

Annual Conference and State Club Week were attended by the Agent.

Bertha Virmond
Cochise County, Arizona
